

Go with GREENSTONE Authorized Generics from Pfizer

What is an Authorized Generic?

An Authorized Generic drug

- ✓ is made by the manufacturer of the original brand-name drug but does not use the brand name on the label
- ✓ is the same size and shape as the branded drug and may have a different color or marking
- ✓ is like other generics, bioequivalent to the brand (meaning they get to the part of the body where the drug works at the same time and in the same amount)
- ✓ similar to other generics, meet the same standards of quality and manufacturing as the brand-name drug

And GREENSTONE Authorized Generics are available at generic pricing.*

GREENSTONE, a US-based company owned by Pfizer Inc., has been providing Authorized Generic versions of original brand-name drugs for over 25 years. GREENSTONE also provides Authorized Generics from other manufacturers in addition to several generic products.

Committed to High-Quality Generics

GREENSTONE Authorized Generics are manufactured to the same standards and at the same facilities as the original brand-name drugs

GREENSTONE Authorized Generics carry the legacy of the brand-name products' years of clinical research, data, and patient and physician experience

More than 90% of GREENSTONE Authorized Generics are manufactured in the US or Europe
